17/06/2006: Chris, W3CMP, plans to be on from Haiti (NA-096, WLOTA LH-0343) June 17-28th while on a missions trip with the Northwest Haitian Christian Mission, www.nwhcm.org/ . He will sign HH4/W3CMP from grid FK39WD, St. Louis du Nord on the north coast. He will have 6 and 2M gear along. There's an existing tower with tribander at the site. He hopes to mount more antennas above the existing ones. He will emphasize multiple hop sporadic E openings on 6M and whatever meteor scatter or sporadic E he can find on 2M also. He will do some limited HF operating. Chris notes HH has been absent from 6M the past few years. He hopes to give it out as a new 6M country to many ops on this end. Yet to be determined is whether Chris will have his 800W or his 200W 6M amplifier along. He will have a five or six-element yagi. As an aside, Chris also notes that he may ask about the possibilities of a KP1 (Navassa) operation, since he hears that Haitian fishermen occupy the island on a regular basis. [Tnx SM7AED]

Dear DX/contesters,

Following a national referendum on May 21, 2006, the Republic of Montenegro declared its independence on June 3, 2006. Montenegro's independence is now recognized by a growing number of countries.

The very first amateur radio activity from this new DXCC entity will be managed by an International DXpedition Team, and is planned to take part very quickly after approval of the DXCC status.

More information about this event can be found at - http://www.yu6scg.cg.yu/international-dx-festival-montenegro-2006/

If you are interesting, please download application from WEB and send it back to me.

Also you can speak personally with OC members PB2T and N6OX in Friedrischafen, if you will be there.

Ranko, YT6A, Team Leader

MASS SATELLITE DEPLOYMENT -

The largest ever deployment of amateur radio satellites is due to take place on 28 June. No less than 13 CubeSats - as the tiny 1kg satellites are called - will be launched into orbit by rocket from the Kazakstan Baikonur Cosmodrome. The satellites will be put into a 500 by 566km orbit with an inclination of 97 degrees. Each satellite, measuring just 10cm cube, is packed with a battery, transmitter and various experiments. Twelve of the satellites have downlinks in the amateur radio satellite service allocation between 435 and 438MHz and one will operate on 145.950MHz. One of the CubeSats was built by students at the Nihon University in Japan. It contains a CW beacon, Digi-Talker and other experiments. After launch, it will operate a CW beacon on 437.485MHz using the callsign JQ1YGU. For further information on amateur radio satellites, including advice on how to build one yourself, visit website www.cubesatkit.com. Amateur radio satellites will also be discussed at the Amsat-UK International Space Colloquium on 28 to 30 July at the University of Surrey in Guildford. [Tnx GB2RS]

CHANGES TO AMATEUR RADIO LICENSING IN SPAIN -

The Spanish Government has approved new amateur radio regulations which came into force 10th of June 2006.

The most important changes are:

- The extinction of the three Spanish licences (General-EA, Restricted-EB and Novice-EC). All Spanish licensed have the same privileges from now on, so you will hear in all bands not only EA but also EB and EC stations.

- All amateurs are allowed to use the 50-51 MHz band, including visitors from CEPT countries or others foreign amateurs with temporary licence, but there are geographical restrictions in the centre of Spain due to TV emissions.

The text of the new regulations in Spanish language can be found at http://www.ure.es/ureinforma/Reglamento_Radioaficionados.pdf [Tnx Southgate ARC]
